Carbon Raiser

Product Details

Carbon Raiser is made of Graphitized Petroleum Coke. It is made from high quality petroleum coke under a temperature of 2800°C. And it is widely used as the best kind of recarburizer for producing high quality steel, special steel or other related metallurgical industries because of its high fixed carbon content, low sulfur content and high absorb rate.

Carbon raiser also can be used in plastic and rubber production as an additive.

Carbon raiser sells well and enjoys a good reputation in Japan, Korea, India, USA, and other European countries, also the order quantity is keeping increasing and the application scope is expanding.

Specification for Carbon Raiser

| TYPE | F.C (MIN) | Sulfur (MAX) | Ash (MAX) | Volatile Matter (MAX) | Moisture (MAX) | Size (90%) |
|-----------|-----------|--------------|-----------|-----------------------|----------------|------------|
| OWD-GPC-1 | 98.50% | 0.50% | 0.70% | 0.50% | 0.50% | 0.5-5MM |
| OWD-GPC-2 | 98.50% | 0.30% | 0.50% | 0.50% | 0.50% | 0.5-5MM |
| OWD-GPC-3 | 98.50% | 0.05% | 0.70% | 0.80% | 0.50% | 0.5-5MM |
| OWD-GPC-4 | 99.00% | 0.05% | 0.50% | 0.50% | 0.50% | 0.5-5MM |

Sizes of the Carbon Raiser that we supplied:

0-1,1-3mm, 0-5mm, 1-5mm, 0-10mm, 5-10mm,5-10mm,10-15mm or at customers' option

Packages for [Carbon Raiser China](#):

1. By 1 ton big bag (without small bag inside)
2. 25kgs paper bag, 40 bags in one ton-bag
